Summary

Web Designer skilled in designing and developing responsive, user-focused web applications using HTML, CSS, JavaScript, React, and Figma. Experience contributing to a Flutter-based Women Safety application for SP Office Sangli Cyber Police and delivering a paid turf booking web application. Strong understanding of responsive design, UI components, and modern front-end development. Seeking an entry-level Web Designer role to create intuitive and accessible digital experiences.

Core Competencies

- Web Design • Responsive Web Design • Wireframing & Prototyping • Responsive Layout Development
- UI Design • Front End Development

Skills

Languages: HTML5, CSS3, JavaScript

Frontend: React.js, Tailwind CSS, Bootstrap

Design Tools: Figma

Version Control: Git, GitHub

Other: CSS Grid, Responsive Design, Flexbox

Experience

Application Developer *Women's Safety Application- SP office, sangli* **2025-2026**

- Developed a Flutter-based Women Safety application based on departmental requirements.
- Implemented emergency assistance, live location sharing, and intuitive mobile interfaces.
- Collaborated with stakeholders to gather requirements and deliver a functional application.

Projects

TurfNow - Turf Booking Web Application (Paid Client Project)

Technologies: React.js, Node.js, Express.js, MongoDB, Razor pay, WhatsApp API

- Designed and developed a responsive turf booking web application for a client.
- Implemented real-time slot booking, secure authentication, and online payment integration.
- Optimized API performance and deployed the application for production use.

Cyber X - Visitor Management System

Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Socket.io, JWT

- Designed and developed a modern Visitor Management System to digitize visitor registration, check-in/check-out, and visitor tracking for organizations.
- Implemented role-based authentication, QR code visitor badges, real-time dashboards, and analytics to streamline visitor management and improve security.

GrowUp - Startup & Investor Platform

Technologies: React.js, Node.js, Express.js, MongoDB, JWT Authentication

- Designed and developed a responsive platform connecting startups with investors through a streamlined onboarding and investment workflow.
- Created role-based interfaces for founders and investors, improving usability with intuitive dashboards and structured navigation.

Certification

Front-End Development *Cub to King IT solutions* **Jun - 2025**

- Covered HTML5, CSS3, JavaScript, Bootstrap, and Responsive Web Design.

Education

Diploma in Information Technology **2022 - 2023**

Government Polytechnic, Kolhapur (Autonomous)

B.Tech. in Computer Science

Padmabhooshan VasantraoDada Patil Institute of Technology, Sangli.

2023 - 2026
